### EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Walter Ottesen on 11/21/05.

2. The following changes to the drawings have been approved by the examiner and agreed upon by applicant: element 70 has been included in figure 2 similar to the way in which it has been added to figure 1 in the drawing amendment filed 8/1/05. See attached figure 2. In order to avoid abandonment of the application, applicant must make these above agreed upon drawing changes.

3. The following is an examiner's statement of reasons for allowance: Buma et al. fail to show the arrangement of the pressure supply vessel means with respect to the directional valves enabling the first, second, third, and fourth lines to be blocked and unblocked <sup>as of 11/21/05</sup> according to the switching states of the directional valves as set forth in claim 2. The submission of the verified translation of the German foreign priority document overcomes the 103 rejections using the Folchert et al. reference. Finally, submission of the approved terminal disclaimer overcomes the double patenting rejection. Accordingly, the claims are allowable over the prior art of record.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably
